

Hong Kong Construction Industry – A brief Update

- Social Unrest and Turbulence
- Construction Market declined by 7% year-on-year in 2019
- Political Disputes slowed down public projects funding
- Anti-epidemic Fund
- Training Subsidy

Promotion of Innovative Construction Technology

- Shortage and ageing of construction labour forces
- Need to enhance the competitiveness of the construction industry
- HK\$1 billion Construction Innovation and Technology Fund
- Modular Integrated Construction (MiC) is one of the identified supporting technologies under the CITF scheme
- 8 MiC projects under construction in Hong Kong
- Gross Floor Area calculation exemption as incentive of MiC

Tuen Mun – Chek Lap Kok Link

- 9km long linking Tuen Mun, Lantau Island and Hong Kong International Airport
- The Link will reduce the journey time between North West New Territory and Lantau Island from 30 minutes to 10 minutes
- It helps reinforce the Hong Kong International Airport as a regional aviation hub
- The final section of the Link will be completed by the end of 2020.
